

Carry Cot

Got twin newborns? No worries! Simply add one or two Carry Cots to transport your little ones in tandem. The NEO Stroller is fully equipped to handle two Carry Cots, making it the perfect solution for transporting your precious cargo.

The Carry Cot is ideal for daytime naps, allowing you to enjoy a full day out with peace of mind knowing your baby is safe and comfortable. With its spacious design, you can even hang a toy inside the hood to keep your baby entertained. The cover can be easily opened for convenient access, while the large canopy provides excellent sun protection and ventilation, ensuring your baby stays comfortable and cool.

The carry cot is ventilated on both sides, promoting airflow. We recommend using the bassinet until your baby is around 6 months old or able to sit up unaided. Experts agree that bassinets are the safest way to transport babies during this stage. The flat, firm surface supports healthy muscle and spinal development, allowing your baby to stretch out freely. Plus, it helps keep their airways clear—unlike sitting in a seat, where the head can fall forward and restrict airflow.

What's included:
Bassinet (including canopy)
Bassinet Mattress
